

You've got  
important  
things to do.

Don't let  
complications  
with your  
medications  
get in the way.

### Did YOU know?

- One in four people may have risks with their medications that can affect their health.
- Missing a single dose of some medications can be dangerous.
- Adding a new prescription to your current mix could have serious consequences.

## MedMonitor is your very own medication safety net.

MedMonitor scans your medications to catch potential issues *before* they become a problem—so you have more time for the important things in life.

Complications with your medications can happen, especially when you see multiple doctors who prescribe different medications for different conditions, or when you just aren't sure how to use your medications properly. MedMonitor works diligently behind the scene to scan your medications (no matter which pharmacy you use) and to identify potential risks, drug interactions, and other issues. As a company-paid benefit, this service is available at **no cost to you**.

Janice

I thought that all my doctors knew my full medication list so I just can't believe that I was taking duplicate treatments! I don't want to think about what could have happened if I didn't have MedMonitor watching out for me."

Roseanna

I didn't realize how risky it was when I didn't refill my prescription on time. I'm so thankful MedMonitor kept me on track!"

Omar

I had so many medications... and I was afraid to take some of them because of potential side effects or interactions. MedMonitor found a better, simpler way to combine my meds so it's safe and easy for me to use."

**MedMonitor is a worry-free safety net that monitors your medications for complications.**

### **Supported by friendly, knowledgeable pharmacists**

If a potential medication issue is identified, a HumanisRx pharmacist will reach out and take steps to help make sure your medications are working the best for you.

- HumanisRx pharmacists are licensed, experienced and dedicated to helping you with your health care needs.
- All consultations are by phone on *your* time and in the comfort of *your* home. No awkward in-store discussions. No line-ups. No pressure. Just a friendly, supportive check-in with helpful advice and recommendations.

Of course, if MedMonitor does not find any issues with your medications, you won't hear from us. We'll just continue to work in the background and be ready to help if the need arises.

### **Completely confidential**

You can rest easy knowing that your medication and health information will be protected. To respect your privacy, we do not share your information with your employer and all consultations take place at times that are convenient for you.

### **Lower benefit costs**

MedMonitor may even help you save money by reducing your out-of-pocket benefit costs.

### **Proven and reliable**

MedMonitor is powered by RxCompanion,<sup>™</sup> an advanced proprietary software that scans your medications (based on claims submitted to your health insurance plan) for early identification of potential issues.
